

How it Works

Contributed by Administrator

The Slow Down® Hay Feeder Soaker comes fully assembled! The only tool you'll need is a screwdriver if you'd like to attach your Slow Down® Hay Feeder Soaker to the stall wall. We'll even provide you with the hardware!

Here is what is included when you purchase a Slow Down® Hay Feeder:

Fully Assembled Feeder Tub Feeder Plate Two D-rings Two wall Mounts One Soaking Plug

Filling the Feeder: ([Click here to see a video demonstration](#))

Remove plate Place flakes flat
into feeder tub Place plate back on
snap into locked position In 30 seconds,
ready to feed!

Soaking Hay: ([Click here to see a video demonstration](#))

Make sure plug
is in place Fill with hay, then water.
Allow to soak Pull plug to drain Without the mess,
ready to feed!

Place your new feeder anywhere!
